Starting my career as a Frontend Developer, I made a significant impact with my strong design skills. Especially by working with the impressive Javascript framework React, I contributed to a series of successful projects. Additionally, I enhanced projects further with my expertise in technologies like Next.js. I conducted collaborative work with various frameworks and CSS frameworks, consistently fostering a positive atmosphere and contributing energy as a team player. These qualities are supported by positive feedback received from my past employers. Thanks to my design vision, technical skills, and team harmony, I continue to surpass myself in every project by delivering impactful solutions.

EXPERIENCE
